
Flinders MD Advanced Studies

CALL FOR RESEARCH PROJECTS

commencing in 2022

Advanced Studies

Advanced Studies is a research and scholarship theme integrated across all four years of the Flinders medical course. Students can elect to undertake postgraduate coursework or supervised research.

You can you become involved in Advanced Studies research by:

- Offering one or more research projects
AND/OR
- Adding your name and research interests to the list of potential research supervisors

A research supervisor:

- Provides guidance to students regarding the appropriate level of work required for each of the relevant aspects of the project (e.g., literature review, recruitment, data collection and analysis)
- Maintains regular contact with the student throughout the project (over three years)
- Monitors and regularly assesses the student's progress
- Supports the student to present their research work in peer-reviewed settings
- Assists the student to recognise the impact of their research and how this may be translated into a publication (e.g., at a national or international conference, or scholarly journal article)

Funding (\$2000) is allocated for each research student to support project-related expenditure (e.g., consumables, conference/workshop registration, publication fees).

BECOME INVOLVED!

- Applications are now open!
 - Please use the *Research Project Proforma* (attached) and email your proposal to md.advancedstudies@flinders.edu.au
OR
 - Email your details (i.e., name, email, and area(s) of research interest) to md.advancedstudies@flinders.edu.au
- Please refer to the *Information for Potential Research Supervisors* (attached) for further information

SUBMISSION DEADLINE: 15 JUNE 2021
