# Highlights from AGBT Conference with 10X

Hear the latest from leader in single cell and spatial -  
VisiumHD, Chromium GEM X, Xenium multiomics

The Team from 10X will recap the latest updates from the recent AGBT Conference where they unveiled **VisiumHD**, **GEM-X** and new cell segmentation for **Xenium** in situ analyser. You will hear about the latest advancements, including enhanced cell typing, rare cell detection, and higher resolution spatial transcriptomics, driving discoveries in cancer, immunology, epigenetics, neuroscience, and beyond.

## MODERATOR

Dr. Guillermo Gomez  
A/Professor in Precision  
Medicine (Neurooncology),  
Centre for Cancer Biology

## Date/Time

Wed. 27 March  
12:00 - 1:30pm

## Location

CCB/Bradley, L8  
Or online via TEAMS

## SPEAKERS

Brad Duncan, PhD  
Country Manager 10x  
Genomics, ANZ

Geoff McDermott, PhD  
Science & Technology  
Advisor 10x Genomics, ANZ

University of  
South Australia
